

Big power. Small footprint.

Meet the new Revoria Press™ EC2100 Series and SC285 Series production printers. Compact, high-speed and built for brilliance - with five-color printing capabilities and stunning image quality.

200+

patented technologies fueling image quality, productivity and sustainability in a compact footprint.

Image Quality

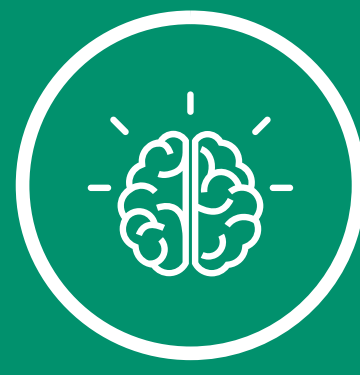

High-Resolution Printhead

New 2400 x 2400 dpi LED head with 10-bit depth delivers sharper detail and uses 1/12th the size and power of previous models.

Super EA-Eco Toner

Smaller toner particle size with consistent shape reduce scatter, increase clarity and operate at lower temperatures.

Smart Monitoring Gate*

Real time detection and correction ensures proper registration and delivers consistent output.

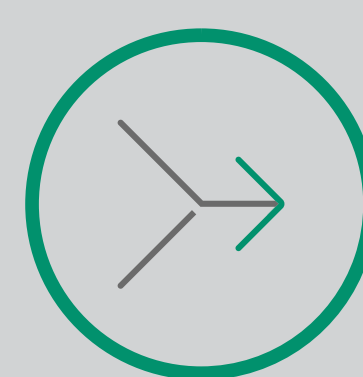

* Optional accessory

Productivity

Full-Speed on All Media

Prints at up to 100 ppm (EC2100 Series) and up to 85 ppm (SC285 Series) on all media weights (52 gsm - 400 gsm) - no slowdown on heavy stocks.

Compact Footprint

Vertical Toner Development System enables 5-color capability in same footprint as traditional 4-color models.

New Bias Transfer Belt System

Improves toner transfer and reduced banding on heavy stock.

Versatility

5th Color Station*

Print specialty colors like Pink, Clear, Textured Clear, White, Silver and Gold** for unique applications.

*EC2100S and SC285S models

** Check with Fujifilm representative for availability.

Wide Media Range

Supports sizes from 3.5 x 5.75" to 13 x 51.1" banners, plus synthetics and water-resistant papers.

Air Suction Feeding*

Enhances feeding reliability across paper types.

* Optional accessory

Workflow & Innovation

Revoria Flow DFE*

Pink toner optimization, Pantone simulation, and Specialty Color Viewer boost vividness and streamline setup.

* Optional digital front end

Static Eliminator*

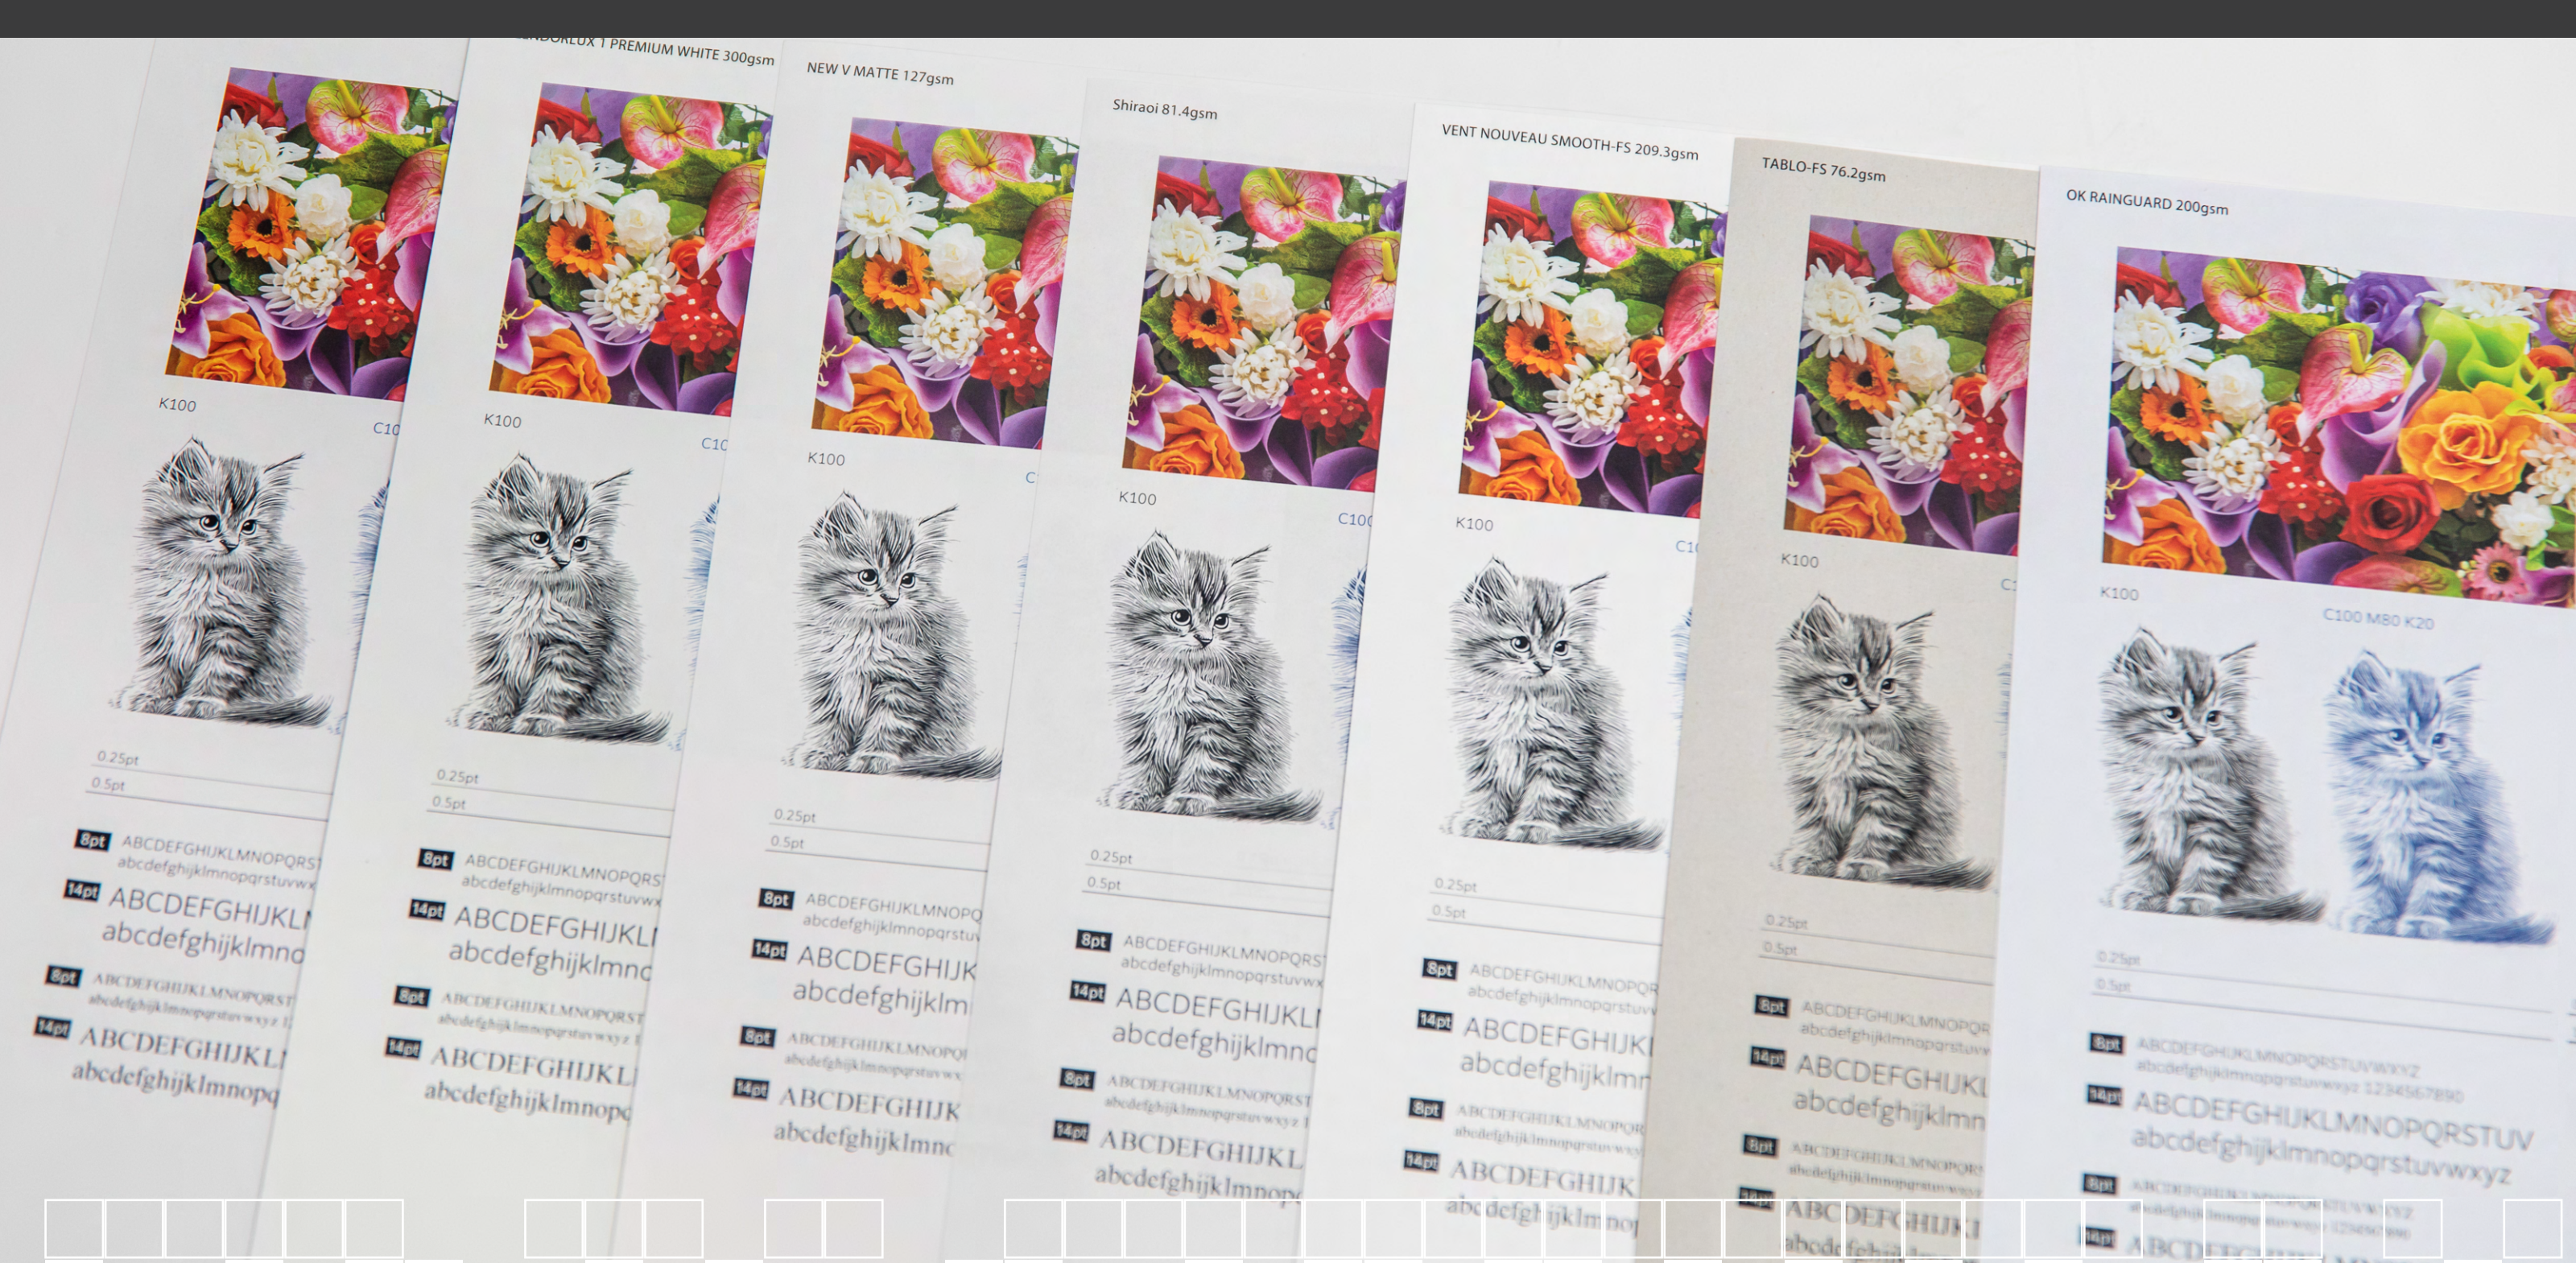

Reduces static for smoother finishing on synthetic and specialty media.

* Optional accessory

Expanded Finishing Options

Multi-position stapling, folding, trimming, plus hole-punching for unique document finishing requirements.

Let's talk about how these presses can elevate your production game.
